Art Unit: 1616

## **Non-Final Office Action**

Claims 1-15 are pending. No claim is allowed at this time. Claims 13-15 are withdrawn from consideration as non-elected invention. Elected invention is Group III and elected species is compound 2.

## Summary of this Office Action dated Saturday, October 27, 2007

- 1. Information Disclosure Statement
- 2. Copending Applications
- 3. Specification
- 4. Double Patenting Rejection
- 5. Response to Remarks
- 6. Communication

considered.

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been

Applicants must bring to the attention of the examiner, or other Office official involved

with the examination of a particular application, information within their knowledge as to other

**Copending Applications** 

copending United States applications, which are "material to patentability" of the application in

question. MPEP 2001.06(b). See Dayco Products Inc. v. Total Containment Inc., 66 USPQ2d

1801 (CA FC 2003).

**Specification** 

The specification has not been checked to the extent necessary to determine the presence

of all possible minor errors. Applicant's cooperation is requested in correcting any errors of

which applicant may become aware in the specification.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Application/Control Number: 10/529,612

Art Unit: 1616

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPO 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 2. Claims 1-12 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the compounds disclosed in U.S. Patent No. 6,965,032. The reference teaches substituted dihydro 3-halo-1h-pyrazole-5-carboxylates. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds of formula III in column 2 which are structurally similar to the claimed compounds. See also column 26, formula III and the abstract. Claims are read in the light of specification. Based on the disclosure of US '032 instant invention would have been obvious to one skilled in the art at the time invention was filed.
- 3. In this case assignee is same.

## Response to Remarks

Applicant's response has been fully considered and was found persuasive therefore compounds containing W = C or N has been included.

Application/Control Number: 10/529,612 Page 5

Art Unit: 1616

In order to advance the prosecution applicant may consider calling the examiner to discuss the

issues surrounding this application.

Communication

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Sabiha Qazi, Ph.D. whose telephone number is 571-272-0622.

The examiner can normally be reached on any business day.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Johann Richter, Ph.D. can be reached on 571-272-0646. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
